Election/R strictions

Response to election/restriction requirement:

Applicants have elected group I, claims 1-3,5-7, 9-11, 26 and 27; therefore, dependent claims 33-80 will be included as claims to be examined on the merits. It is noted that claim 3 contains divergent species and an election of species requirement is set forth below.

Species Requirement

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1 - beta-D-dioxolanyl-guanine, beta-D-dioxolanyl-2,6-diaminppurine, beta-D-dioxolanyl-6-chloropurine, beta-D-dioxolanyl - 2-aminopurine, class 536, subclass 27.21 .

Species 2- bis pom PMEA, class 514 , subclass 344.

Species 3- entecavir, penciclovir, famciclovir, ganciclovir, lobucavir class 546, subclass 276.

Species 4 - ribavarin, class 514 , subclass 252.1+.

Species 5- cis-2-hydroxymethyl-5-(5-fluorcytosin-1-yl)-1,3 (3TC) class 514, subclass 274.

Species 6- L-D4FC, D-D4FC, class 544, subclass 317.

Species 5- interferon, class 530 , subclass 300+.

Species 7 – entecavir (BMS-200475), class 514, subclass 45+.

Art Unit: 1623

Species 8 – mycophenolic acid class 560 , subclass 8+.

Species 9 – LFMAU, class 424, subclass 1.89.

Species 10 – L-thymidine, L-2'-deoxycytidine, L-2'-deoxycytidine-3', 5'-di-O-valyl,
536, subclass 28.4+.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 3 is generic.

Because these inventions are distinct for the reasons given above and the search required for the divergently classified species would be unduly burdensome, restriction for examination purposes as indicated is proper.

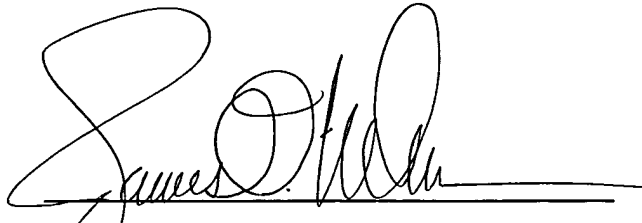

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
